## Introduction

How would you like to make \$500 an hour consistently and with little effort. If you learn the Power Gambling Strategy then by tomorrow you will be on your way to making \$5,000 to \$10,000 a week. And you will do it in the most relaxed and enjoyable method possible."

If you are like most persons, you are struggling just to make an income you can live on. Whether you have tried Internet marketing schemes, mail order promotions, MLM or Network marketing - or purchased advice from so-called experts - *you have been disappointed.*

What's even worse, with so much "how-to" information available, you can become paralyzed. . . **and very frustrated.** After all, if you understand how life works, you know that you are racing against time. Most of your rightful profits are still up for grabs. **But how much longer will they wait while you learn the best way to get your share?**

**MORE AND MORE** people are learning a new and proven way of creating high profit streams for themselves that are unlike

anything you may have seen before. Yet the clock continues ticking and time may be running short for you.

There is a much better way to make lots of money, safely and on your own terms. I am going to reveal to you a foolproof way that I use to make literally mountains of cash anytime I want. And I do this with almost total certainty of success and almost zero risk of failure.

### **I am talking about an amazing strategy that . . .**

- **Takes almost no money to use and can be set up as soon as tomorrow morning.**
- **My colleagues and I use to rake in huge amounts of pure profits, all in the form of cash. We do this without any employees, office expenses or overhead.**
- **You can use to make steady and reliable profits from several casino games that most experts said couldn't be beaten, until now.**

Is so reliable that it can give you the kind of steady and reliable profits that almost no other business can.

**There is one approach to making money quickly and easily that it is not like anything you have read about before. It is a powerful way to produce high profits with low risk and minimum hassle. In fact, it has been called "the safest moneymaking strategy you will ever find."**

**You are about to discover how this same proven strategy can "consistently create large profits for you." This is the same reliable system that a small group of knowledgeable insiders are using right now to rake in millions of dollars in the most pleasant manner imaginable.**

**And that's just the beginning!**

This strategy can make you thousands - even tens of thousand - of dollars. I'm serious. **But the best part is this strategy costs almost nothing to implement and produces results you can bank on immediately.**

I have found an almost uncanny system that beats nearly all casino games, both in land-based and online casinos.

**This "Power Gambling Strategy" is revealed for the first time in a fact-filled course that will become your key to making large profits safely and easily.**

For example, you can get started with as little as \$50 and become a video poker expert with a powerful winning edge over the casinos.

With just a \$100 starting bankroll, you can win at roulette, craps and blackjack game after game, day after day, week after week.

Incredibly, there is even a special power gambling strategy you can use to win at slot machines, with almost no investment and very little risk of loss.

## **Beyond Any Doubt, Power Gambling Strategy Players Are Beating the Casinos Cold!**

Right now I want you to forget everything you may have heard about casino gambling. If you are like most people, you have become conditioned to believe that only luck is involved in winning. Most people believe that somehow they will be "luckier" than the next guy and find out the hard way that Lady Luck is indeed a fickle lady.

However, there is a better way to play certain casino games. I am talking about a way of playing that incorporates what I call **"proven strategy enhancers"** to actually gain and keep an edge over the casinos. Please stay with me because I am going to tell you exactly how you can do this too.

## **A Small Group of Knowledgeable Persons Are Draining Thousands From Casinos**

As you read this, a small group of persons are using these same strategies to drain thousands of dollars from both land-based and online casinos.

Angela M., really likes the freedom to make money sitting at her home computer. In her e-mail to me she said -

**"Your Power Strategies are a snap to use. I have been playing roulette online with great success. Last week I made \$4,340. I really love it."**

Angela M., Los Angeles, California

Another colleague lives in Las Vegas and plays three days a week. Eric told me -

**"This is a magnificent way to play casino games. I took your suggestion and I specialize in two games - craps and blackjack. Last week I was up \$2,590 at craps and \$4,835 at blackjack. Your strategy is fun, easy and very profitable."**

Eric W., Las Vegas, Nevada

**There are few consistent winners in today's casinos.**

Truthfully, there are few consistent winners against today's casino games. You hear about occasional winners because the casinos like to give the impression that there are lots of winners.

For instance, winners of large jackpots on slot machines get lots of publicity.

What I call modern folklore would have you believe that card counters regularly win at blackjack and that casinos are deathly afraid of "counters."

In movies you will see players calmly rolling the dice for thirty minutes and winning thousands of dollars at the craps game.

Or you might see a sophisticated man about town calmly plunk down a \$25 chip on a roulette number, casually winning \$875.

After seeing these events, many persons get an adrenaline rush and head for the nearest casino, with face flushed and eyes glowing, feeling almost certain that they will win too.

**In the real world game of gambling, there are few real winners other than the casinos. But this is changing. A small number of persons are regularly winning at the same games that regularly defeat the masses. This group is not smarter or luckier than the average gambler. However, the elite members who consistently beat these games have one thing much stronger than random IQ points or fickle luck. They have the knowledge and a proven way to using it to consistently beat the casinos.**

### **The Power Gambling Strategy Uses Several Unique Concepts to Simply Overpower Typical Casino Games**

The Power Gambling Strategy uses several easy-to-learn, but critical rules based on "dynamic betting" to generate large and consistent winnings. But please don't let the name "dynamic betting" intimidate you. Even though it is a very powerful technique and one of the key reasons that Power Gambling wins so consistently, it is not a difficult concept to learn.

**Let's get one thing clear right now. When you apply the specialized Power Gambling Techniques, you won't be walking around the casino observing games and writing down information.**

When you use the Power Gambling Strategy, you can start setting up your winning bets as soon as you begin play.

When you play video poker, your first step is to find a qualifying machine. This is very easy to do once you know what to look for.

Once you find the "right machine" you can begin play using our exclusive set of Power Play Rules. If you want, you can carry

these rules in your pocket and refer to them when you play. To win at video poker, you only have to follow the Power Play Rules and then use the specific Dynamic Betting Strategy to win.

**Slot machines are even easier to beat than video poker.** The key knowledge here is finding the best machine and the Power Gambling Strategy is unerringly accurate in giving you the exact guidance you need to find and beat these machines.

**Each of the table games has a specifically tailored set of Power Gambling Techniques, consisting of the Power Play Rules and how to use the Dynamic Betting Strategy.**

I know this may sound very complicated, but it really isn't. Think about what is involved in driving a car. You can easily list dozens of things you must constantly consider and adjust for such as weather, road conditions, traffic, speed limits, the condition of your car and visibility. You will drive much differently on a crowded icy road at night than will you do on a sunny street with few other cars.

When I start listing these considerations, driving begins to sound very complex. Yet, most people learn to drive and automatically make the adjustments needed.

**The Power Gambling Strategy may sound a little complex when I describe it, but like driving, once you experience it and practice a bit, you will find that it is very easy to do.**

## Start Winning Almost Immediately

I am confident that you can do very well using this perfected method of play. I can say this because I have taught others to play, and I have experienced first hand how quickly most persons absorb and then automatically apply the rules needed to win.

If you are like others I have taught, you will be simply amazed at how well you will do. Once you start applying these proven techniques, you will rapidly develop what will seem like your own cash machine -

- **When you apply these proven methods, you will win at an extraordinarily high rate. Most players routinely win over 90% of these gaming sessions.**

- **You don't have to invest much to get going. If you are willing to plunk down a \$5 wager, you can rapidly **create a \$300 an hour source of income!****
- **As you gain in skill and confidence (and as your winnings grow larger and larger), you will want to increase the size of your wagers. The system is set up to accommodate you and show you exactly how to do this. In almost no time, you can be making **\$500 or even \$1,000 an hour.****
- **Best of all, you won't have the rug yanked from under you by large losses. There is even a specific **Loss Limit Rule** you will use to keep your losses small and infrequent.**

I have never seen a more potent yet steady and predicable way of playing and beating these casino games. **The thing I love is that while you are winning large amounts of money, you will always keep your risk very low.**

In fact, the cornerstone of the Power Gambling Strategy is that of controlling risk. Let's face it. Most gambling systems win some of the time. A typical system is presented with only its winnings revealed. It is not until you try the system that you discover, often painfully, just how dangerous frequent losses can be.

**Most gambling systems are very risky and will end up costing you a lot of money. While they may win occasionally, when**

**they lose, the losses are often so catastrophic that all winnings are depleted and you will rapidly go in the hole.**

**Without a doubt, the typical gambling system is very hazardous to your financial and emotional health!** That is why I am so impressed by the results of the Power Gambling Strategy. With its high win rate of over 90% and with infrequent small losses, you can quickly build your winnings into a sizable amount.

One player called the Power Gambling **Strategy "the intelligent person's option to playing the stock market."** I won't comment on this because I still have some of my pension money tied up in stocks. However, I will tell you this -

**The Power Gambling Strategy is a complete winning strategy that has performed consistently through thousands of games in both real and in the online "virtual" casinos. It is not a theoretical method that someone dreamed up, but a practical, proven method this is being used to win even as I write this.**

Why don't you give it a try? If you order your own "Risk-Free" copy of this strategy right now, I will even include several bonuses worth hundreds of dollars as my special gifts to you. Just [Click Here](#) to get going right now.

## The Real Power of This Strategy

Your chance of winning a game using the Power Gambling Strategy is **over 90%**.

This means that you can approach each short session with a high degree of confidence in winning.

Part of the genius of this system is giving you an "Automatic Profit Rule" that alerts you when it is time to call a game completed.

One of the major reasons most people lose at gambling is that they don't know when to quit. Remember the Kenny Rogers song, "**You've got to know when to hold 'em and know when to fold 'em.**"

The **Automatic Profit Rule** is just one of a group of specially formulated rules that will place you squarely in the winners' circle.

The concept of **Outcome Based Betting using a Dynamic Betting Strategy** is the core of the **Power Gambling Strategy**. This concept helps you **know exactly where to place your next wager and how much to wager.**

When you use this strategy, it is almost as if you had a gifted mathematician standing by you and giving you expert guidance.

Except that it is much easier than that. I doubt that the casinos would appreciate you bringing your own guru to each table. In addition, pocket-sized calculators are not allowed in most casinos and in Nevada, using a computer to beat a casino is considered a felony.

Fortunately, a very sharp airline pilot named Daniel Austin figured out a fail-proof way to beat the casinos without having to use a computer. He spent almost seven years painstakingly developing the complete Power Gambling Strategy.

Daniel knew that there was a way to beat most casino games by inputting the results of previous decisions and then using a complex algorithm to compute probabilities and determine the

size and place of the next wager. In case you're wondering, Daniel majored in electrical engineering in college and he can quickly go over my head when he slips into mathematical jargon.

However, as smart as he is, Daniel recognized that making complex calculations was just not feasible in a casino environment. **This was the major issue he struggled with for years to overcome.**

Finally, after years of trial and error he developed a simple, but highly effective set of playing rules that provide all of the power of the computer-based analysis, but are simple and easy to use.

**His perfected system is being used right now to consistently win at certain select casino games.**

I regularly use his system, and I am constantly amazed at just how easy and effective it is.

**More than that, we have documented proof of the system's effectiveness.** For me, computer analysis is only one step in proving that a system works. I will only accept the results when I can prove it by actually using it to win. This is a huge difference between this strategy and others you may have heard of.

## Let's Compare Using the Power Gambling Strategy With a Conventional Business

In order to succeed in business, you need to have a plan, then find a way to implement this plan. To accomplish this requires discipline, determination and persistence. These are the very same attributes needed to be a successful winning gambler. From here on, the differences between success in business and gambling go different directions.

Most businesses require extensive training or years of "on-the-job" experience in order to succeed. **As a Power Gambling entrepreneur, you can learn the key aspects of the profession in one evening.** So long as you follow the discipline inherent in the system itself, you will not fail.

Most businesses require a substantial investment. You may have to buy real estate, fixtures, equipment, and tie up thousands of dollars in inventory. If you elect to go the franchise route, you will have to pay a substantial franchise fee in addition.

Even if you operate the business out of your home, you are still stuck with business taxes, licenses and other fees. You will have recurring monthly expenses, such as the telephone, computer software, office supplies. And don't forget advertising. This expense is a necessity if anyone is to know you are in business and it can easily run thousands of dollars every month.

**As a Power Gambling entrepreneur, you will have very few expenses.** Most of the expenses will consist of travel expenses if you decide to travel and play in land-based casinos. Even here, you can offset these expenses with casino comps. **In some cases (and I am going to show you exactly how to do this in a special Free Bonus Book I will send you), the casinos will pay for everything, including your airfare.**

If you don't even want to be bothered with leaving your house to generate profits, you don't have to. The Power Gambling Strategy will work just as well with online casinos. You may decide to be like my friend Scott H., from Prescott, Arizona. He only gambles online. **The last time I checked with him he was making well over \$10,000 a month.**

As a Power Gambling businessperson, you can set your own hours. The idea of having more control over their own lives attracts many people to setting up their own businesses. They tend to focus on the brighter side of being self-employed, like

having no boss and setting their own hours. Then the reality hits.

The people I know who work the longest hours are people who work for themselves. **Most small business owners work many more hours than the standard forty hours a week. Fifty, 60, even 80-hour work weeks are common for many business owners.**

Now, please don't get me wrong. There is nothing wrong with working eighty-hour weeks if that's what you want to do. I guess I have become spoiled. **I can work whenever I want or choose not to work at all.**

**If you have your own business, you will be lucky to take off as many as four or five consecutive days.** Usually the mess that you will come back to is so overwhelming that you will choose to just stay and work rather than deal with the hassles of trying to take a few days off.

**As a Power Gambling Pro, you really can set your own hours.** In fact, in the manual, I consider a full day of work to be four or five hours. You really don't need to ever work longer than that. You certainly don't have to work every day.

If you want to limit your play to three days a week of online play, you can earn a substantial amount just doing this. We have documented results of making \$500 an hour or more playing online. **Ten hours a week of online play can net you a cool \$5,000. And that's all that many people want or need.**

For the moment let's consider risk. People don't like to talk about it, but it is a real factor in everything you do.

**I have known several small business owners who have lost everything they owned because their businesses failed.** And they usually didn't fail because of neglect. The hard-pressed owners often continued to work their eighty-hour weeks right to the bitter end.

When the dust cleared and their business finally collapsed under pressures often not the creation of the besieged owner, their worlds came rapidly tumbling down. The loan agreements they had casually signed at their friendly banker's offices required them to personally guarantee the business loans. Now the full power of these agreements was turned against them. The not-at-all friendly lawyer quickly replaced the friendly banker. **If you want to imagine a true living hell, just imagine that you have dozens of these bloodsuckers on your back.**

If we consider the investor's plight, it doesn't look much better than the business owner's when you consider the downside. Stock markets crash (or hadn't you heard the news?). Investments go sour. Investing, even with the help of so-called investor experts, can itself become a quagmire from which you can barely escape.

Considered in this light, you can see that the prospects offered by becoming a Power Gambler are very bright.

**Besides only working when you choose and where you choose, you will never risk much money. The strategy is very conservative and is loaded with **safeguards to prevent losses.****

What's more, you can get started with almost no money and rapidly build a substantial bankroll.

**Perhaps best of all, as an expert Power Gambler, you will be beholden to no one.** While I will appreciate hearing from you (I never get tired of hearing about my clients' experiences and you may want to send me a testimonial), you will not be beholden to me. You will never have to send me more money. **You certainly won't have to borrow any money or pledge your hard-earned assets to a steely-eyed lender.**

Please read the following words very carefully. **All you have to do to succeed as a Power Gambler is learn some simple, but critical rules and then use the discipline to follow these rules. Just do this, and you will be able to succeed beyond most persons' highest dreams. And you will truly do it on your own terms.**

If you've already decided to order this manual, [click here now](#) and I'll even throw in **Seven Big Bonuses Worth \$280.00!**

You get a full year to try it out at my risk. If *the Power Gambling Strategy* somehow fails you (and it hasn't failed to perform yet), just send me an e-mail and I'll make sure that you are **refunded every penny you paid** - promptly and courteously!

### **It's Time to Put the Power Strategy to Work for You!**

In just a few minutes, you can download the remarkable fact-filled manual I have waiting for you. Please be prepared to be pleasantly surprised and even shocked at what you will find. Here's just some of the information that we will share with you -

- You'll learn everything you need to know to immediately apply this information and start winning. This course is very complete. **Even if you don't know a blackjack from a horseshoe, you will be playing like a pro quicker than you can say, "I am ready to cash in my winnings."**

- You'll get **step-by-step instructions that are easy to follow**. There will be no guesswork on how you will set up your new "profit stream." Everything you need to know is spelled out in crystal clear detail with lots of examples.
- **You'll discover the full power of outcome-based wagering and how to use the Dynamic Betting Strategy**. You will be able to apply this knowledge to win in both land-based and Internet casinos.
- **You'll learn the exact moves to set up a consistent winning strategy** you can use to bring in loads of cash as often as you like.
- **You'll get every trick, fine-tuned method and special technique** that have made this strategy such a consistent performer. There is no question that you will be able to win just like we do!
- You'll learn the **simple, but effective methods** we use to always know exactly what to bet and to know the exact size of your wagers.
- You'll see how you can **gain and keep an advantage over any casino** - virtually undiscovered!
- You'll receive **all of the critical information** we use to evaluate and beat any of our selected casino games - as often as you choose!

- You'll get lots of **specific examples** of how to use this system. You'll even get a complete bet by bet analysis of actual games played!
- You'll get **secret insights** on each game that will enable you to snowball your profits.
- You'll discover, to your delight, how you can legally and with little pressure, put these techniques to work so that **you can build a continuous stream of profits!**

## **Do you want to make \$10,000 a week as a Power Gambler?**

You can certainly do so with this strategy. How quickly you win depends on the size of your gambling bankroll and the time you are willing to spend gambling.

With the advent of Internet gambling, you also have the option of playing against online casinos as well as the more familiar land-based ones.

**Once you experience the strength of using the Power Gambling Strategy, you may decide to give up your job and just play roulette for a living. However, there is more to making this decision than how much you can make using the strategy.**

Neither this system, nor any other strategy is a "sure thing." Life doesn't offer many guarantees like that. However, if your experience is like mine, you will have many pleasurable hours playing and beating the casinos at roulette. And, if you want to "max out" your winnings from the strategy, this report will show you how!

If you are ready to order the remarkable Power Gambling Strategy now, just follow this link -  
<http://www.silverthornepublications.com/PowerGamblingStrategy/>

## Hourly Winnings

One of the best features about this strategy is its predictability. While anything can happen over the next few decisions in any casino game, as you play longer using the strategy, the results become more and more predictable.

After playing hundreds of games in casinos as well as playing thousands of simulated games on computers, we determined that the hourly winnings were pretty much dependent on:

- a. The game you select**
- b. The speed of the game and**
- c. The size of your bets.**

To illustrate the earning power of this strategy, I have decided to use the results from just two casino games - craps and roulette.

The reason I made this decision is that the results of playing these games show less variation from one session to another when you play other casino games.

While the strategy works well with blackjack, video poker and slot machines, each of these games has more variability of results from game to game.

**Blackjack is very streaky.** It is not unusual to have five or six winning games in a row, followed by two back-to-back losing games. For this reason, I decided not to use the results of blackjack play in our examples of profits per hour.

**Both video poker and slot machines have jackpot characteristics.** There are large, but infrequent payoffs, in each game. Once you average in these jackpots, the games can be quite profitable. However, there is greater variability in results from game to game and it makes it more difficult to use results of playing these games to predict hourly or even daily winnings.

**For these reasons, I decided to use just the results from playing roulette and craps to illustrate the average rate of winnings for the Power Gambling Strategy.**

**These illustrations are based on the actual results obtained in hundreds of games played in real casinos.** All of the tables that follow show the amounts you can win over different time periods with different amounts "invested" in each game. However, **there is nothing hypothetical about these winning rates. These amounts are based on actual casino games.**

**Table 1 shows the results of playing roulette.** The assumption for this table is that the spin rate is 100 per hour. At a slower table, your win rates will be lower.

The top row of Table 1 shows size of the "base bets" you will use in an individual roulette game. These range from \$1 minimum wagers, all the way up to \$25 bets. The beauty of this approach is its flexibility. For example, when you are first trying the system, you may want to use the lowest investment possible and start with \$1 chips. It is important to note that you can use the \$1 base bet strategy even on tables with \$5 minimums for outside bets. To do so, you simply make a \$5 wager on one of the even-money wagers (such as red or black) and make the additional \$1 based wagers required by the Power Gambling Strategy.

**Table 1**  
**Hourly Roulette Net Winnings at 100 Spins Per Hour**

Base Bet Size	\$1	\$2	\$5	\$10	\$15	\$25
<b>1 Hour</b>	\$51	\$101	\$253	\$506	\$759	\$1,265
<b>2 Hours</b>	102	202	506	1,012	1,518	2,530
<b>3 Hours</b>	153	303	759	1,518	2,277	3,795
<b>4 Hours</b>	204	404	1,012	2,024	3,306	5,060
<b>5 Hours</b>	255	505	1,265	2,530	3,795	6,325

If you look in the column under Base Bet Size of \$1, you will see the average amounts you can expect to win playing at the levels appropriate for this level of the strategy.

The first amount under \$1 Base Bet Column is \$51, the amount you will average winning per hour at this level of play. Please note that you will not win this amount per hour every hour you play. If you have only winning games, you will win more. If you have a losing game, you will win less. **This is an average net profit per hour, including both wins and losses. The longer you play, the closer your results should be to this average.**

The next amount under the \$1 Base Bet Column is \$102, the amount you would average for two hours of play. I consider anywhere from three to five hours a day a full day's work in a casino. Before you scoff at this, remember we are talking about risking your money in an atmosphere strictly geared to make the removal of your money as painless as possible. Beating the casino at its own games is never a cakewalk, and the shortest

amount of time you take to do it do will help you reduce the effect of the many psychological ploys the casino has devised to relieve you of your money.

**So, at least in my experience, if you bang heads with the casino for three to five hours, lock up your winnings and walk out the front door a winner, you have put in a full day's work.**

Anyway, getting back to Table 1, playing at the \$1 Base Bet Level, you can win \$153 if you play for three hours, \$204 if you play for four hours, and \$255 if you stick it out five hours.

These are not large amounts and you should think of your play with \$1 base bets as your **"practice play."** For serious play, you will want to make \$5 your base bet.

The Power Gambling Strategy is designed in such a way that you can start with very small wagers and gradually increase the size of your wagers as your bankroll grows from your net profits.

**As you increase the size of your Base Bets, your hourly winnings will grow.**

**Using \$5 as your Base Bet, you can win about \$1,265 a day if you play five hours.**

**When you move up to \$10 Base Bets, you will earn about \$2,530 for the same five hours of "work."**

**By the time you move up to using \$25 as your Base Wager, you will feel like you have arrived. At this level, your Net Winnings will average over \$1,265 an hour.** Just so we are clear what we are talking about, I am showing you the amounts of net profits you should average for every hour of play. These amounts are not just based on winning games, but have losing games averaged in as well.

**I know that many promoters will talk about how much you can make and throw total revenue amounts out as if they were "bottom line" amounts. I am giving you the true bottom line amounts that you can expect to remove from the casino. From these amounts you can deduct tips you pay the dealers and the costs of travel and staying in a casino location.**

However, even if you stay in a suite costing \$300 a night and only dine in gourmet restaurants, these costs will still be small compared to the amounts you can win using the Power Gambling Strategy.

Returning to using \$25 Base Bets, you can see that if you play three hours a day, you will net over \$3,795 and for a full five hours of play, you will bring in a tidy \$6,325 profit.

**Table 2 has been constructed along the same lines as Table 2, except that this table shows the results of using the Power Gambling Strategy at Craps.**

Table 2 assumes a rate of play of 100 dice rolls per hour. Many tables will be slower than this, reducing the hourly win rate.

**Table 2**  
**Hourly Craps Net Winnings at 100 Dice Rolls Per Hour**

Base Bet Size						
	\$1	\$2	\$5	\$10	\$15	\$25
<b>1 Hour</b>	\$15	\$31	\$77	\$154	\$231	\$770
<b>2 Hours</b>	30	62	154	308	462	1,540
<b>3 Hours</b>	45	93	231	462	693	2,360
<b>4 Hours</b>	60	124	308	616	924	3,080
<b>5 Hours</b>	75	155	385	770	1,155	3,850

This table is interpreted exactly like Table 1. For instance, if you decide to exclusively play craps, with \$25 minimum wagers you can expect to make about \$3,850 a day for five hours play.

Table 3 averages hourly winnings from roulette and craps and shows you what you may expect if you play a variety of games using this strategy.

**Table 3. Hourly Power Gambling  
Net Winnings at 100 Decisions Per Hour**

<i>Game Buy-in</i>	<i>\$75</i>	<i>\$350</i>	<i>\$700</i>	<i>\$1,050</i>
<i>Time Played</i>				
<i>1 hour</i>	\$41	\$204	\$369	\$572
<i>2 hours</i>	82	408	738	1,144
<i>3 hours</i>	123	612	1,107	1,716
<i>4 hours</i>	164	816	1,476	2,288
<i>5 hours</i>	205	1,020	1,845	2,860

**Table 3 relates the "Game Buy-in" or the amount invested in each game with average hourly winnings.**

Let's consider a player buying in for \$350. He can expect to make an average of \$204 for each hour of casino play. Two hours of play will net him \$402, while a full five hours of play puts him over \$1000, at \$1,020. **If you want to make \$1,000 a day in a casino, with low risk, this may be your level of play.**

**I can almost hear your mind calculating. Let me help you. Let's take a look at how you might decide to move up from \$1 Base Bets to \$5 Bets and then make your way up to making \$25 wagers.**

## A Plan to Move Up in the World

**One of the strongest benefits of learning the Power Gambling Strategy is that you can use winnings from the casino to build your bankroll very quickly.** Anyone who can raise a hundred dollars can get started using this strategy to build a respectable gambling bankroll.

Starting with a \$1 Base Bet, Table 4 shows how you can use casino winnings to increase the size of your bankroll. There is a lot of information packed into Table 4. Let's follow the first row of numbers across.

The left-hand column "**Base Bet Size**" shows the base size of the wagers you will make. I have used \$1 as the lowest bet, although there are many roulette wheels with \$0.50 or even \$0.20 minimum wagers for inside wagers.

The second column "**Table Buy-in**" shows the amount of capital you will use for a single game.

The third column "**Total Bankroll Needed**" shows the total bankroll you need to properly play at each level of the strategy. Because we are conservative, these amounts are higher than the amount you could get by with, but we would rather err on the side of caution.

**Table 4**  
**Hourly Net Winnings to Build Your Bankroll**

<b>Base Bet Size</b>	<b>Table Buy-in</b>	<b>Total Bankroll Needed</b>	<b>Winnings Needed to Reach Next Base Bet Level</b>	<b>Average Hours of Play Needed to Reach Next Level</b>
<i>\$1</i>	<i>\$75</i>	<i>\$375</i>	<i>\$1,375</i>	<i>33.5 hours</i>
<i>\$5</i>	<i>\$350</i>	<i>\$1,750</i>	<i>\$1,750</i>	<i>8.6 hours</i>
<i>\$10</i>	<i>\$700</i>	<i>\$3,500</i>	<i>\$1,750</i>	<i>4.8 hours</i>
<i>\$15</i>	<i>1,050</i>	<i>\$5,250</i>	<i>NA</i>	<i>NA</i>
<i>Total</i>				<i>46.9 hours</i>
<i>Rounded</i>				
<i>Total</i>				<i>47 Hours</i>

The fourth column, "**Winnings Needed to Reach Next Base Bet Level**" sounds like a mouth full. This column shows the total amounts of net profits you need to accumulate at each betting level in order to have a large enough bankroll to raise the size of your base bet.

Now, let's take a look at the first row. Here the results for a \$1 Base Bettor are shown. The Buy-in for this level is \$75, and the total bankroll requirement for this level is \$375. Let's talk about what this means.

**Total bankroll is not the amount used to buy in for each game. That amount is much less. Your total bankroll is the amount needed to protect you against unforeseen losses that are way beyond the limits normally experienced.**

**The Power Gambling Strategy's built-in safeguards will protect you and make losses a very unusual event.** In fact, you may be lulled into a state of complacency and start to feel invulnerable when you use this system. That is usually when disaster strikes and the impossible happens and you lose a couple of games out of the next ten you play.

**With a smaller bankroll, you might pull back, or even lose faith in the strategy. That's why we advocate so strongly that you use a bankroll with a built-in cushion to protect you.**

Let's get back to our \$1 Base Bettor. He uses a \$375 Total Bankroll. He has decided that he wants to move up to making \$5 Base Bets. Now he wonders how much he has to win in order to meet the Total Bankroll Requirements for making \$5 Base Bets.

The answer to this question is shown in column **4 "Winnings Needed to Reach Next Base Bet Level."** **He needs to win \$1,375 before he can safely increase the size of his base wagers to \$5.**

The last column "**Average Hours of Play Needed to Reach Next Level**" answers the next question our \$1 Base Bettor probably has, which is "**How long will it take me to make enough profits to move to the next level?**"

In the case of the \$1 Base Bettor, the answer is 33.5 hours. This is quite a lot of play, especially as compared to moving up from other levels.

We will go through the table from one Base Bet Level to another and see what we can learn.

If you look down the last column showing the average hours needed to move up a level, you will see that the jump from making \$1 bets to \$5 bets is the biggest. There is no reason that you couldn't divide this jump into two of even three levels and move from \$1 to \$2 on to \$3 and finally on to \$5 bets.

**After playing several practice games at the \$1 or \$3 levels, most players will want to move quickly to making \$5 Base Bets. If you like you can start here. The only requirement to make wagers at any level is to cover the minimum suggest Total Bankroll.**

If you have \$1,750 as your gaming bankroll, there is no reason you can't start at the \$5 Base Bet Level. From this level to \$10 Base Bets only takes 4.8 hours of play. **If you play 5 hours a day, in less a day you can move from making \$5 Base Bets to \$10.**

The incentive behind making such a move is to increase your winnings per hour.

If you look back at Table 3, you can see just how valuable this option can be. Making \$5 level bets you will average net profits of \$204 an hour. By moving up to \$10 Base Bets, your hourly net will increase to \$408.

**You might wonder where I have gotten all of these winnings amounts. These amounts were computed based on thousands of hours of actual casino play, both in land-based and Internet casinos.** Over the very short term, your profits may vary considerably.

**For example, if you play for ten hours and have no losses (a very likely possibility), as a \$5 Base Bettor, your hourly winnings will average over \$300 an hour.**

However, all of the amounts I am presented are net of the occasional losses. If you started out and had a loss your first game, you would have a horrible average for your hourly winnings.

The key to success with this strategy is to follow the rules, which are presented in a clear, easy to follow, step-by-step fashion, and to remember that the longer you play, the closer your averages will come to ours.

Using our time proven averages, if you start at the very bottom, making \$1 Base Bets, you can move up to making \$25 Base Bets in about 47 hours on the average. If you win higher than the average number of games, you can move up quicker. If you have more than your fair share of losses, it will take you longer.

Let me digress for a minute and tell you why it is so important that you have enough money set aside just for your gambling. **Have you ever heard of "scared money?" Scared money is money risked you cannot afford to lose.** It might be used for gambling or other speculative purposes like playing the stock market. A key point in determining if the money is "scared money" is to ask yourself the question, **"If I lose this money will it affect my lifestyle?" If the answer is yes, then you really shouldn't be gambling with this money.**

Can you guess what happens when you play with scared money? You don't play correctly because you are afraid to lose. If you are afraid to lose, you will end up doing strange things like losing more than you should.

**With scared money on the line, you will be afraid to take a loss, because you really can't afford to lose any of the money.** So your behavior changes. When you have a losing game, you will be reluctant to take your lumps and pull off the table with a loss. You may pull more money out and continue playing, **because to quit playing would entail recognizing that you had lost money you couldn't afford to lose.**

Once you fall into this trap, your discipline will rapidly disappear and you will find yourself chasing losses. That's one of the things having an adequate bankroll of money especially set aside for gambling will help you overcome. **Having a "risk bankroll" is designed to protect you from losing control when you gamble.**

**If you are willing to devote just a few hours a week to playing roulette you can move up to becoming a \$1,000 an hour player in an amazingly short time period.**

## Time and Money

I prepared Table 5 to help you make decisions on how you want to accomplish the goal of making a set amount of money each week, every month, or any other time period you want to use.

Let's assume that you have practiced the Power Gambling Strategy, seen how effective it is, and now want to use it to supplement your income. Table 5 shows some options on how you might decide to meet your goal.

Assume that you have decided that you use this strategy three days a week for three hours per day (nine hours invested in gaming).

Looking across the first row "**Total Bankroll**" gives us an idea of how much we have to have available to apply the Power Gambling Strategy for 9 hours a week. **Our bankroll must be at least \$1,750.**

If we look across the row for Weekly Winnings for 3 days at 3 hours per day, we see that with a \$1,750 bankroll (the amount needed for a \$5 Bettor), we can make \$1,836 over nine hours of play, and as a \$10 Base Bettor (\$3,500 bankroll required), we will average \$3,321 for nine hours of play.

You can compare different time and dollar investments using the amounts shown in Table 5. If you are interested in playing professionally, you want to give the amounts in the last two columns a hard look.

**Table 5**  
**Winnings Compared by the Amount of**  
**Time and Bankroll**

<i>Total Bankroll</i>	<b>\$375</b>	<b>\$1,750</b>	<b>\$3,500</b>	<b>\$5,250</b>
<i>Avg Hrly Winnings</i>	\$41	\$204	\$369	\$572
<i>Weekly Winnings:</i>				
<i>3 days at 3 hrs per day</i>	\$369	\$1,836	\$3,321	\$5,148
<i>4 days/3 hrs per day</i>	\$492	\$2,448	\$4,428	\$6,864
<i>5 days at 4 hrs per day</i>	\$820	\$4,080	\$7,380	\$11,440
<i>5 days at 5 hrs per day</i>	\$1,025	\$5,100	\$9,225	\$14,300

You can use Table 5 to estimate the amounts you will make under different time and money assumptions. If you want to make \$10,000 every week playing roulette, you have several options.

**You can play 4 hours a day for 5 days a week, with a \$5,250 total bankroll and make over \$11,000 a week.**

If you compute annual returns the numbers really look interesting. **Table 6 shows the average net income if you play 25 hours a week for 50 weeks per year.**

**Table 6.**  
**Annual Income for Each Level of Betting Assuming a 25**  
**Hour "Work Week" for 50 Weeks**

<b>Total Bankroll</b>	\$375	\$1,750	\$3,500	\$5,250
<b>Annual Income</b>	\$51,250	\$255,000	\$461,250	\$715,000

I will let you draw your own conclusions from the amounts shown in Table 6.

**By now you should have a pretty good idea how my protegees and I have set up regular income streams, sometimes in excess of \$10,000 a week of pure profits, without any employees, overhead, business licenses or even the need to leave home!**

**If you would like to join our group and become a winning  
Power Gambler, just follow this link -**

## **An Elephant Never Forgets**

Have you ever been to a circus and noticed how a circus elephant is anchored to the ground? There is a metal collar around one leg attached to a small chain. The chain is attached to small wooden peg driven into the ground

Did it ever occur to you that this is not enough to hold a five or six ton elephant in place if it decided it wanted to leave. Why, all the elephant would have to do is give the peg a good yank and it would be free of its tether. But it won't. **Do you know why?**

When the elephant was a baby it had a collar, chain and peg used to hold it in place. When the elephant was small, this restraint system was actually strong enough to keep the elephant in place. The baby elephant would pull on the chain until a cut appeared on its leg caused by the collar rubbing its leg. The next time the elephant tried to pull free, the collar would bite into the sensitive tissue and it would hurt. So the elephant learned to stop pulling and trying to escape.

The elephant grew up but it never forgot that bad experience with the chain and the pain it felt when the collar dug in. So the elephant thought, "I am not going to pull on that thing because it does no good, and besides it hurts."

The adult elephant had a "perceived constraint." **All of us have perceived constraints to one extent or another.**

Imagine that you were playing roulette at the \$5 level and won \$340 in an hour. You had made the decision to stay with nickel chips until you determined that the strategy you were using was sound. As the game progressed and your winnings grew you calculated how much you would be winning if you were playing with Base Bets using green (\$25) chips instead of nickel (\$5) ones. This is a pretty straightforward mathematical conversion, isn't it?

Sure it is when you are just playing with figures. But when you move up to playing with black chips, your hands may start to shake a little. As my ol' Daddy used to say, you may feel as nervous as a hooker in a prayer meeting.

Now you are in a pressure cooker. **You are no longer confident because you have strayed too far from your comfort zone.**

At the nickel level, you absorbed four straight losing bets, costing you \$20. But if those bets were made with green chips instead of reds, you would be out \$100, and you'd feel that loss. Would you have done the same thing at this point, as you did with the red chips? You probably wouldn't have. Instead, you pulled off the

table, licking your wounds and remembering the bad experience when you tried to play at the green chip level.

If you have experienced this, even one time, you may very well be like the circus elephant remembering his bad experience with the collar when he was a baby. Because of your bad experience playing at a higher level, you may develop an aversion to playing at higher levels. Once you develop this perception, you will have a great deal of trouble moving up to higher playing levels, even though on paper it looks easy.

## How Much Can You Make?

Most people who have not experienced playing in casinos day in and day out believe that if you can make \$100 a day in a casino, it is just as easy to make \$5,000 a day.

If you look at the rate rates in Table 5, you can easily compute very high win rates. *If you want to make \$14,000 a week, just move up to using a \$5,250 bankroll and play five hours a day, five days a week.* Your winnings should average about \$14,300, call it \$14,000 as a rounded amount. If you play just forty weeks a year, this works out to \$560,000 a year. As generation X says, "**Just do it!**"

Although the Power Gambling Strategy manual shows you a winning strategy, and this report will give you some ideas on how much you can make with the strategy, the Power Gambling Strategy is not a get-rich-quick scheme. Even after you succeed at the lower levels of play, all kinds of complications come into play when you try to maximize your success by betting larger.

One factor you will have to contend with is your perceived constraint against playing and losing at higher levels. If you buy in for \$2,000, you have to accept the possibility of losing two thousand dollars in a very short time period. **Can you handle this? Even though you know that loses are infrequent and that the system can overcome the effects of losses, what are you going to do the first time you buy in for \$2,000 and lose \$1,500 of it?**

If you play the system correctly, mechanically you will know exactly what to do. And, if you follow the strategy correctly, this loss will most likely just be a temporary setback. It is no different than losing three hundred dollars in a \$400 game. Or losing \$37.50 if you buy in for \$50.

**One of the problems you will face as a \$25 or higher Base Bettor is that your play will come under constant scrutiny.**

The casino personnel will be watching your every move like a hawk, because the size of your play represents a real threat to the casino. Every win you rack up is giving the casino a loss, and the bosses don't like that. Even though you are playing a "negative expectation" game that the house feels secure about, nobody likes to lose. If you win too regularly and too consistently, it is just a matter of time before they intervene.

I made my own personal choice about gambling a long time ago. I prefer to play frequently at moderate levels. **I will buy in with amounts from \$1,000 to \$2,500 typically and generally be satisfied with winning \$500 to \$1,500 per session.** I play several times a month in local casinos and have almost zero heat. Even though I am a winner, I essentially play for fun.

## Rules to Help You Keep Your Winnings

**There is no question that if you follow the Power Gambling Playing and Betting rules you will generate wins.** I have even given you the average wins per hour achieved in actual play. Does this mean you can relax? Unfortunately no. Even though there is no question that you will win using this system of play, there is still the issue of leaving the casino with your profits in hand.

**One of our most important rules to help you leave a winner is the 90% Rule.** This rule says very simply that if you are close to hitting a target profit or a daily profit, that sometimes 90% or so is close enough.

I recall very well an acquaintance of mine who had a monster roll at a craps table. When I walked up to the table, Joe was rolling the dice and playing with \$500 chips scattered all over the layout. By the time he sevens out, he was up over \$48,000. This is not bad considering he bought in less than an hour earlier for a grand. I strongly urged him to come with me and take a break. I reminded him how badly he needed this score and how good he would feel walking out with his winnings intact. He nodded and smiled and then gave some lame excuse about wanting to bet with just a couple of more shooters.

I had more than made my nut for that day. In fact, catching the last ten minutes of his hot craps roll had put me way ahead. I decided to take a break in the coffee shop and try some of the coconut cream pie, which was reputed to be the best in town.

I ran into another friend and talked for over an hour. When I came back out, Joe was still at the same table. I walked up and noticed his pitiful little pile of green chips. Joe gave me a lame look and continued to play. I saw him the next day and asked him how he ended up. **"Tapped out," were his words. "You didn't drop the whole 50 grand did you?" I asked.**

"It was only 48 thousand," he responded. **"The reason I kept playing is because I wanted to hit 50 thousand."**

As I walked away, I wondered to myself what in the hell is the difference between 48 thousand and 50 thousand when you are that much ahead?

I think 48 thousand should have been close enough, don't you? Any time you are struggling to hit a target profit, are playing on a short time schedule or just start to hear that little nagging voice somewhere in the back of your skull telling you to watch out, you can remember Joe. He should have known that 48 grand was close enough. Don't ever get hung up on exact amounts. If you are trying to win \$50 and hit \$48, you can call it close enough and take a break. Remember, you will never go broke by taking a break early and walking off with your profits intact.

**If you are not using the Power Gambling Strategy, you're losing money. You can't lose if you order this strategy now.**

You can try the strategy at your leisure - in either your favorite land-based casino or on the Internet (don't worry if you don't know about Internet gambling, I'll show you how to do this). **If you don't make at least \$2,500 clear profit, I will cheerfully refund your money.** [Click here](#) to order online now.

## **A Week in the Life of a Power Gambler**

I opened my eyes as a crack of sunlight appeared through a space left between the heavy curtains. I got up and walked to window pulling the curtains back. The sun was so bright it almost hurt my eyes. From my suite in Rio I have a clear view of the strip going north towards downtown. Traffic looks like it has already come to a stand still on Las Vegas Boulevard, known affectionately as The Strip.

This is my fifth day in Las Vegas. Today is the day I wrap this trip up and head for home. I put on the coffee and munch on a sweet roll left over from the night before. I look at the summary page in my notebook.

<b>Date</b>	<b>Black-jack</b>	<b>Craps</b>	<b>Roulette</b>	<b>Daily Win</b>	<b>Cum Win</b>
Mon 10/8	+1,718	+1,512	-	+3,230	+ 3,230
Tues 10/9	+ 513	+ 612	+3,412	+4,537	+ 7,767
Wed 10/10	+5,807	-	-	+5,807	+13,574
Thurs 10/11	-	+4,604	+1,206	+5,810	+19,384
Friday 10/12					

**Average Daily Win = \$4,846**

Today is the 12<sup>th</sup> of October, a beautiful, if hot, October day in Las Vegas. I am starting to plan my day as I take my first sip of coffee and skim the first page of The Wall Street Journal. This week's earnings show that I had a fairly good week. My goal has been to make at least \$4,000 a day and with average daily winnings of \$4,846, I am well ahead of my goal.

Last Monday, I started the week playing here at Rio. It does not have the best roulette wheels in town, but the ambiance is just fine and the dealers are all very friendly. I spent Monday morning at a quiet roulette table and by noon I had locked up a win of over \$2,000. I had lunch in the coffee shop, simply a burgher and an glass of iced tea, and I went back to my room for some reading and to catch up on my e-mail correspondence.

About 4:00 in the afternoon I came back down and decided to try a little more roulette. The game started off badly and I pulled

off after giving back almost three hundred dollars of my morning win. I had violated my own loss limits in doing this, but I was in a lighthearted mood and my game wasn't as sharp as it should have been.

Besides, I was ready to change gears. **While I love winning game after game with the Power Gambling strategy, I also like a change of pace.**

The craps pit provided just the change I needed. **In a little over an hour I picked up a nice win of over \$1,500 at craps and I called it a day.**

I needed to get back to my room, take a shower and change clothes since I had plans to visit a couple of my local friends tonight. With a daily net win of \$3,230 I was a little short of my daily goal of \$4,000, but it had been my first day here and I like to ease back into the gambling mode. This was not a bad start at all.

Tuesday was roulette time. I had wanted to play roulette at the Monte Carlo for some time and when I woke up Tuesday morning, I knew that my focus for the day would be roulette.

After my usual morning routine of coffee and reading the paper, I took a cab to the Monte Carlo, found an empty spot at a roulette table, and started playing the Power Gambling Strategy.

The strategy didn't fail me. **By 1:00 in the afternoon I had locked up a \$3,412 win from playing roulette.** I was famished at this point and decided to head downtown to the Golden Nugget coffee shop.

You may have noticed that I seem to spend most of my time eating in coffee shops. When I am with my lovely Diane we often go to upscale restaurants. When I am on my own, as I was this trip, I prefer the informality of coffee shops for breakfast or lunch and steak houses with some of my rowdy friends for dinner.

After downing a delicious Ruben sandwich and watching people for about an hour I was ready for another diversion. I had done so well with roulette in the morning, that I didn't feel much like another roulette session. I really like playing craps and blackjack at the Golden Nugget and I finished up my gambling day with a short craps session, where I won \$612 and a very short blackjack session, adding another \$513 to my winnings. **On Tuesday I won \$4,537, exceeding my daily goal and taking some of the pressure off.**

Even though I am essentially playing for fun, I still put pressure on myself to hit certain win levels each day. **Whether I hit them or not doesn't affect my life style, but I can tell you that my mood is always much better if I exceed my daily win goal.**

Wednesday was a blackjack day. I woke up thinking about playing blackjack in a smoky, crowded sawdust joint in downtown Vegas. If you guessed Lady Luck and the Four Queens you got it right.

When I arrived I cased the blackjack tables looking for certain signs of a highly beatable table. After walking around for about ten minutes I spotted an empty table with a pretty young woman named Susan dealing.

I spent the next four hours at Susan's table, laughing, relaxing and piling up a win close to six grand. I must have tipped Susan over two hundred dollars during this time period and it was one of my more enjoyable blackjack sessions. When Susan's shift ended I decided to leave as well. I returned to Rio for a meeting I had set up to discuss some properties I own and after the meeting I came back downtown for a leisurely dinner at Hugo's Cellar.

On my way out I noticed some lively action at the craps table. I vowed to come back the next day and try out the craps and perhaps try a little roulette action.

On Thursday, I overslept, a not to rare of occurrence after one of the of the marathon dining sessions at Hugo's Cellar. I first dined there in 1985, and after all of these years, your lady companion is still presented with a rose. But they should post a warning. The dessert cart is hazardous to your cholesterol level.

After my usual coffee and morning paper reading, I started the day with a five mile walk and used the time to good advantage planning a book I will start on when I return home.

After the walk, I took a nice long shower, hit Rio's coffee shop for some bacon and eggs and then I headed back to the Four Queens.

I arrived about 2:00 in the afternoon. Instead of being dead as the tables usually are mid-afternoon, one of the open tables was crowded with the players cheering and giving each other high fives. While the Power Gambling strategy does well on any kind of table, it is a lot more fun to play on lively tables and I found a spot next to one of the dealers and I bought in for \$2,000.

Naturally the table cooled off almost as soon as I arrived, which is one of the problems with trying to play any kind of system relying on hot tables. **Fortunately I don't need a hot table and I managed to win \$1,206 in two hours play on a very choppy table.**

Thursday night was celebration time. It was my last night in Vegas and my winnings had hit an average of \$4,846 a day.

I called Diane early afternoon and she caught a 5:00 nonstop into Vegas and arrived about 7:30 p.m. I arranged for a limousine to pick her up and our congenial driver. Two iced glasses were set up on a walnut table when we returned to the limo. A large assortment of call brand liquors were available. I poured us a couple of stiff ones, adjusted the stereo, and lay back to enjoy the ride to the casino. As usual, there was construction in progress around the airport. Diane smiled and cuddled close saying, "This is just what I needed. Now what's next?"

I laughed and told her, "Just wait till you see our suite."

At the casino entrance a natty looking doorman helped us exit the limousine. We immediately went to VIP Services bypassing the usual lines required to check in.

We went upstairs to our lavish suite. The view of the Strip was spectacular and I knew that we would enjoy the view later that night sipping our complimentary Irish coffees.

Our casino host, Marv, arranged for an assortment of cheeses and other munchies to be delivered to our room along with a bottle of my favorite bubbly. While finishing off the Champagne, we brought each other up to date. It's amazing what four days apart can do. Even though I had lined up dinner at a lavish gourmet restaurant, Diane confessed she had had a long week and preferred one of those "kick off your shoes and whatever else comes off" type of dinners.

She didn't have to twist my arm. It's now Friday morning. I am sipping my morning coffee. Diane is still sleeping. I could play some more blackjack today. Or maybe some craps. Or check out the new roulette table at . . .

**Or, I could just take it easy. I chuckled as headed for the shower. I really don't have to do anything today, do I?** After showering I pulled on the complimentary robe and noticed my notebook still open to the summary page. I quietly closed it. As someone said, "Man does not live by bread alone."

## Living a Life of Ease

When you go to the casino, you need to remember that your one purpose is to win. You can drink, party, visit, flirt and relax on your own time after you have locked up your daily win. After becoming a proficient Power Gambler and increasing the size of your minimum wagers, you will be able to travel a good part of the year, courtesy of your favorite casinos. This may become an important part of your retirement plan. You can use your new skills at roulette to pay for your vacations and pocket a good deal of change as well.

You may consider becoming a full time pro. Before you make this step, I want you to think about it very carefully. Whereas playing several times a month and winning can bring you a great deal of pleasure, having to play every day to make your daily nut is very difficult.

Casinos can be glamorous and exciting if you don't have to be in one every day. On a daily basis, I can think of many things I had rather do than go through the repetitive grind of play needed to hit

my daily win goal. Everyone is different. If you think you would like to turn pro, I suggest you take a two week vacation and spend at least ten of the days in a casino playing roulette four hours a day. If, after two weeks of this, you are still game for more, then maybe you have what it takes to become a full time player. If you are like me, you may have to settle for being a part time pro and playing less frequently.

I hope you find the Power Gambling Strategy to be a lifetime source of income and satisfaction. I would like to hear about your experiences. You may write me in care of the publisher. I wish you the best in all of your life endeavors.

I have tried to give you a feel for what Power Gambling can do for you. If you would like to learn even more about this remarkable system, just follow this link -

**Beat the  
Internet Casinos!**

**SILVERTHORNE  
PUBLICATIONS**

**How would you like to make \$5,000 a week? What if I told you there is a guaranteed way to do this without ever leaving home?**

**I have discovered an amazing proven way to make a fortune off Internet casinos. Now you can use this proven strategy to make \$500 or more an hour from your living room chair!**

Dear friend,

**How would you like to set your own hours, and regularly win \$500 or more an hour?** It sounds incredible doesn't it? Do you need a way to make \$5,000 or more every week? **What if I told you that you can do this spending about two hours a day on your computer? You'd probably think I was crazy.**

Before you throw this letter away, let me tell you a little more about this amazing way to make money. This is not like any of the flaky "make money at home" scams like envelope stuffing or mail order businesses. **I have discovered a 100% proven fail-safe way to make just about any amount of money you want.**

Would you like to pay cash for your next car? I just bought a new GMC Yukon XL and paid cash. My home mortgage is paid off. But best of all, I have complete peace of mind knowing that I can make another \$500 or more every time I am willing to spend an hour on my computer. I know you will feel as good as I do once you know this ultimate secret of winning!

If you already have a computer, you probably know about the Internet. It is in the news almost every day and is incredibly easy to use. If you have a way to get on the Internet, you can start making more money than you ever dreamed possible. Even if you don't have a computer, I will show you how you can get started making huge amounts of money every day!

## ***Beat the Internet Casinos is the Complete Winner's Guide***

This fact-filled manual is the complete winner's guide with everything you need to know to start winning \$500 an hour or more. **It even shows you how to start with only \$50 or \$100 and work your way up to winning thousands a week..**

You will know exactly where to play, which games are best, and you will have the exact strategies to maximize your winnings. I even share information on my personal winnings, with complete examples, so that you will know exactly how to start winning **\$5,000 a week or more**

But there is even more. A special chapter included with the manual shows you how to expand your winnings to even higher levels. I will show you how you can easily win \$10,000 or more a week using the same techniques. If you have ever wanted to win a fortune in a short time period, this is your chance!

**This is the information you need to make the year 2003 the best year in your life. I will share with you information on just how easy it is to get started. Since you are already on the Internet, you can start making big bucks the day this manual arrives.**

By exclusive arrangements with the author, I have included two chapters from *Beat the Internet Casinos* as a special bonus. **If you are interested in finding out more about what the Gambling Strategy Research Group said about this extraordinary money-making strategy, just click here - <http://www.silverthornepublications.com/BeatTheInternetCasinos/>**

# Excerpts from *Beat the Internet Casinos!*

## Introduction

It was almost 8:00 in the evening. Connor glanced over at Cathy. Josh had just gone to bed. The house was reasonably quiet with their three-year old out of the picture. Connor told Cathy he had a little work left to do and he walked back to their home office.

Connor sat down in front of the computer. It was already on as it always was, and ready to browse the Internet. Since the cable company had installed the cable system, allowing continuous online access, he had decided to leave his computer running twenty four hours a day.

Connor pulled his log book out from the bottom desk drawer. He immediately flipped to a bookmarked page and smiled. He had not forgotten the download after all. Now to get down to business.

He reviewed the directory he had set up on his hard drive for the special software needed for this operation. Sure enough, there was the file for the WinNow online casino in the proper directory. He clicked on the file with the "exe" extension and waited while the file installed itself on his hard drive.

The installation was finished in mere seconds. Now it was time to earn some money. Using the newly installed software, Connor logged on to the WinNow casino. He had set up his account the night before and everything was ready.

Connor smiled to himself at the ease of beating the online casinos. Find the right casinos, register with them, download the special software needed to play online. Then begin the operation of moving cash from the casino's account to his.

He reviewed the menu of the casino's offerings. Even though this casino offered twenty-four games, attended to by scantily clad virtual attendants wearing low slung togas, barely covering their charms, he didn't hesitate to pick the game he wanted.

The game launched successfully using his recently downloaded casino software. He selected the "play for fun" mode and played for a few minutes to get a feel for the game. It was the familiar Starnet software; there was no need to spend much time practicing.

He had played similar software many times. The results were highly predictable the way he played the game.

There was still one more thing he wanted to check. He reviewed his e-mail. WinNow had send him an urgent electronic message, thanking him for signing up and explaining how he could "earn" a bonus for playing with them. He chuckled. He definitely was going to earn this bonus and more.

He changed the play mode to playing for real. His \$1,000 deposit was there, matched by an additional \$200 from the casino. He turned on his calculator. Everything was ready.

Connor went into his playing mode. His right hand would clink on the mouse to enter a wager and as soon as the wager was made his hand would fly to the calculator to record it. He occasionally consulted a small chart when he was uncertain how to proceed.

After fifteen minutes of play, he noted that he had logged in enough time for half a session. He had won \$480 from the casino. Time to take a break. He trotted down the hall and mixed himself a scotch and water. There was no need to break into a sweat over this he smiled. Cathy asked him to bring her a decaf. She was watching her favorite TV show and he promised he would join her in a few minutes.

He logged off the WinNow casino. He would let his winnings sit a few days, play another time or two and then cash out. So long as

he played in exactly the right manner, he could continue his winning methods with virtually no heat from the online casinos.

He selected a different Internet gambling site, the Loving Touch Casino. What a jerky name he thought. But it didn't matter. Loving Touch met every item on his list for another casino where winning was almost a given.

He noted that he was up over \$575 from his last playing session. He recorded the amount in his log and searched for a different game.

He had racked up a good win at craps last time, but tonight he was impatient. Craps was fun, but it took a little too long. He opened the baccarat room and was greeted by a virtual croupier, complete with tuxedo. He "sat down," or rather moved his mouse in the correct manner to indicate that he was joining the game, and began playing.

Before he started, he made sure he had totaled out his wagers from the previous game. He started the same routine. He would enter a bet with a couple of mouse clicks and then repeat the same bet on his calculator. In another thirteen minutes, he was ready to wrap up this session. He had won \$490, bringing this evening's total winnings to \$1,065.

He had one more thing to do. He flipped a few pages in his notebook and noted another download he wanted to make.

He entered the new Internet casino's URL in his browser, and in a few seconds he was offered the chance to download the software for the English Butler Casino. He set up the download to begin, and the software starting transferring a file over the Internet from the virtual casino to his personal computer. Now he was finished. He would check on the status of the download before retiring for the night, but for now he wanted to keep Cathy happy.

He grabbed his scotch and water and headed for the family room. Cathy was bringing him up to date on her favorite sit com before he even sat down. He smiled at her antics. She had both feet firmly planted on the ground except for a couple of deviations, one of which was the Peoples' Plot. It was the silliest thing he had ever seen, but she loved it.

As she filled him in on the latest antics involving a family populated by lunatics who all lived in the same mid western town, he thought about his new business.

He was making over \$5,000 a week by gambling on the Internet five times a week. He never played on Friday or Saturday nights, and he usually took Sunday night off as well, making up for the lost session by playing one afternoon during the week.

He couldn't slight the hourly pay. He was earning about \$750 an hour, even counting his administrative time.

There is no question that gambling on the Internet is on the rise. Connor is doing just that, risking real money and piling up winnings at a rapid rate.

The purpose of this book is to show you exactly how to beat the Internet casinos. I have been a frequent patron of land-based casinos for many years, and until recently I never believed I would wager on the Internet. As an old timer once told me, "Never get into a dice game using invisible dice."

With great skepticism I started investigating online gambling about six months ago. What I found will astound you. Online casinos offer an advantage that is never found in "real world" casinos. The advantage I am talking about is not the obvious one — the fact that you can play them from home.

While this may be considered a unique way to gamble, it is not the advantage I want to share with you. Incredibly, many online casinos have a flaw in their basic structure which turns what is normally a casino-favored game into a player favorable game.

Once you know about this "flaw," you can play the online games with every expectation of being a consistent winner.

My job is to tell you everything you need to know to learn about how to consistently beat the online casinos. Once you have this knowledge, you will be able to turn playing online into a very profitable part time endeavor or even become a full time player.

Let's move into the world of Internet gambling. Throughout this book I will refer to the addresses for different web pages. These addresses are called URLs, which is short for Uniform Resource Locators. The URLs I will show you were current when this book went to press, but the Internet is constantly changing and URLs

will change. I will share with you a number of online resources you can use to find web site, but one trick you can use when a URL can not be found is to drop all of the address following the extension "com," "net," or "org." Here's an example. Assume you try to reach:

[http://www.gamblingnews.com/sources\\_now.htm](http://www.gamblingnews.com/sources_now.htm) (I made this up so don't try this address).

If you reach a dead link, just cut off everything following ".com" which will give you the URL of the main site

<http://www.gamblingnews.com>. You should reach something there unless the entire site is vanished.

If you are not yet online, I advise you to gain Internet access as soon as possible. You can buy a new computer which will do everything you need to access the Internet casinos for \$500. If even this is too steep for your budget, consider a used computer for even less. So long as you stick with a Pentium class computer (or a comparable offering from Apple), you will be fine. If you have been delaying making this step, this book will give you a strong incentive to get online now.

There is a fortune to be made from the web casinos, and I am going to show you exactly how to do it!

## **Internet Gambling is on the Rise**

Whenever he is unable to sleep or needs a quick pick-me-up, Bob turns on his home computer, finds an Internet casino and gambles away his money using his credit card and a mouse.

From the privacy of his home he can find almost 800 casinos online and turn his PC into an electronic casino. His bets will be accepted 24 hours a day, and the online casinos offer a greater variety of games than the land based ones.

Fueled by the explosive growth of the Internet and by a general acceptance of gambling as a legitimate form of entertainment, online gambling is growing at a torrid rate.

All studies of Internet gambling agree that it is growing very rapidly. It more than doubled from 1997 to 1998, according to a widely cited report by economist Sebastian Sinclair. From 1998 to 1999, the number of online gamblers increased from 6.9 million to 14.5 million, with revenues growing from \$300 million to \$651

million. By 2001, Sinclair predicts that there will be 43 million Internet gamblers generating \$2.3 billion in revenue. Estimates of the current number of online casinos range as high as 850. I have tracked down about 700 of them (See Appendix A for a complete list of Internet Casinos).

Games range from traditional casinos games like video poker and slot machines, to poker, keno, bingo and other games. Here is a list of games offered by just one online casino: Baccarat, Blackjack, Craps, Pachinko, The Dragon Spirit Pachinko, Victory Poker, Caribbean Poker, Free Ride Poker, Pai Gow Poker, Red Dog, Roulette, Sic Bo, Slots, Gold Rush Slots, Magic Hat Sportsbook, Video Poker, Deuces Wild Video Poker, Jacks or Better Video Poker, Joker's Wild Video Poker, King of Decks, War, and Battle Royal.

Because the uncertain legal status of Internet gaming in the U.S., virtually all online casinos that accept wagers are located outside of the United States.

Some online casinos are fronted by celebrity pitchmen such as former NFL star turned actor and beer pitchman Bubba Smith (<http://www.bubbascasinos.com>) and daredevil motorcyclist Evel Knieval (<http://www.evelknievalcasino.com>).

Other online casinos are themed to offer everything from social experiences (<http://www.TheSinglesCasino.com>) to a casino designed to appeal to motorcyclists (<http://www.easyrollers.com>).

For those of us who gamble on the Internet to win, themes are of little importance. The theme of the casino does not give us any clue as to whether the casino is beatable.

Technologically, many of the casinos are very similar as there are a relative handful of software developers for the online casinos games. Each casino using software from the same developer will have a similar appearance to others casinos using the software.

Generally, online gambling sites are divided into three categories, based on types of technology used.

Many e-casinos require prospective gamblers to first download a program onto their local computer before playing. Usually the programs are free. These online gambling sites can be good places to start your play as, once installed, the programs offer great graphics, sound, animation, and of course, the chance to play for free.

The drawback to the sites requiring downloads is that you will have to wait for the application to download from the casino's site to your own hard drive. This process scares many Web newcomers off as they don't know how to download and install a downloaded program. I will review this process for you shortly, so that you will be able to download without fear.

Since downloading usually takes some time and ties up your computers' resources while the process is occurring, I usually schedule downloads to occur after I have gone to bed or at some other time I won't be using my computer.

A slight disadvantage to downloading a file off the Internet is the risk of downloading a computer virus along with the file. You should install good virus protection software on your computer before you download any files off the Internet. You may download either freeware or shareware anti-virus programs at <http://www.davecentral.com>. I use Norton Anti-Virus software which can be continuously updated via the Internet, so that the program is always current.

The second type of software used by the online gambling sites is JAVA software instead of the downloadable programs. JAVA is a computer language developed by Sun Microsystems in 1995.

JAVA software allows programs to create little programs known as applets which are embedded directly into a web document.

When online casinos use JAVA, these applets run directly through your Internet Browser. All of the JAVA sites offer fairly good graphics, and some offer sound and animations as well.

I am not a fan of casinos using JAVA. With a JAVA casino, you have to load the software every time you play; whereas, with downloaded software, you can begin playing almost instantly once the software has been installed on your computer. I have also

found that JAVA applets occasionally freeze my browser. In such a situation, you may not be sure whether your last bet was accepted or not. At any rate, it is very disrupting to have start over in the middle of a game.

The third type of site found uses software based on HTML (Hyper Text Markup Language), which is the standard language used to create Web pages.

Sites using only HTML are fast to play, but they often have cheesy graphics and no sound or animation.

Problems associated with online gambling far outweigh the benefits for many would-be casino operators and gamblers.

Issues include concern about the possibility of rigged games and low pay-outs, software copyrights, credit card debt, proving the age and eligibility of players and monitoring and regulating online gambling.

While online gambling is legal in many parts of Europe, Latin America, Australia, Asia and the Caribbean, it remains in a legal gray area in the United States.

Legalities are still being hashed out in this area where technology has clearly outpaced the law.

There are many reasons why wagering online is going to be around a long time. First and foremost is convenience. In the past ten years there has been explosive growth in the gaming industry. From coast to coast, there are thousands of new gaming establishments all over the USA, but they still cannot match the pervasiveness of the Internet.

Convenience is one of the online gaming industry's biggest attractions. How else can you win \$300 at lunch time playing baccarat online?

Another reason the online casinos are growing so rapidly is privacy. Many players in land-based casinos are reluctant to try table games such as blackjack, craps, roulette or baccarat out of a fear that they will appear foolish. With just your mouse, keyboard and monitor as your companions, there is little reason to feel inhibited, and many persons, who would not normally play casino table games in a real casino, are playing the games in the electronic casinos.

Another factor to consider is variety. Only a few of the world's largest casinos can come close to offering the variety of games found in the Internet casinos. With over 30 games available online, plus sports betting, bingo, scratch cards and even lotteries, the Internet casinos offer some tough competition.

One of the biggest draws for online gamblers is the no-pressure environment of playing on your PC. You can refer to your blackjack strategy card without feeling conspicuous and you can take as long as you want to make any playing decision. Using the strategies I am going to teach entail using a pencil and paper as well as a calculator - items you wouldn't think of carrying into a brick and mortar casino.

One fear many persons have about online gambling is the legality of it. Our concern is primarily whether we can play these games and stay out of trouble with the law. Let's take a look at the current state of the legal environment of online gaming.

I hope you have enjoyed these excerpts from Beat the Internet Casinos. If you are ready to order, just click here-
