About this Report. . .

This report is designed to be used as part of the extensive course on playing and beating online casinos described in the manual [Beat the Internet Casinos](#). The complete manual is available online and may be downloaded in the next five minutes if you like.

Just click here to get your own copy of what has been called "the ultimate guide to beating the online casinos."

Quick Checklist Before You Play Online

Here is a list of items to check before deciding to deposit cash with an online casino:

1. Find a casino with a sign up bonus. There is no point in playing in any e-casino which does not give you at least a 10 percent bonus.
2. Check to see if the casino is licensed. Appendix 5 of *Beat the Internet Casinos* lists unlicensed e-casinos.
3. See if the e-casino is listed as a licensee of a major software brand. Appendix 3 of *Beat the Internet Casinos*. This table lists the major software brands and their URLs.
4. Review some of the resources I have shown you to see if any obvious problems, such as numerous consumer complaints, are apparent. Appendix 2 in *Beat the Internet Casinos* shows a number of Internet resources you can use to get the latest information.

5. Check the lists of sites to avoid. Appendix 4 in *Beat the Internet Casinos* has a list of sites to avoid as of the time this book went to press. But don't forget to check some of the other references I have given you as situations change very quickly on the Internet.

6. Visit the e-casino's web site. Verify the current amount of the bonus offered. If the bonus is given as a percent, is there a limit on the dollar amount? What games are offered? We will only be interested in playing certain games and the casino must offer them to remain in contention. Are there transaction fees? How much are they.

7. Find out if the e-casino is audited? If the auditor is a large, well known firm, so much the better.

8. Visit the e-casino's "about us" page giving information about the operators. If it doesn't have one, you may want to check the WHOIS database to get more information on the principals.

9. Find out who processes the credit card transactions. Not all sites show this information, but it is very helpful when you have played in dozens of casinos and are trying to reconcile your records.

Download the software and play some of the games without depositing any money. If you are still not quite certain about the e-casino or if you have any problems or questions with the software, try e-mailing or phoning the e-casino. If you can't reach someone now, don't even think about depositing a nickel with them.

How We Determined the Top Ten Web Casinos

We found what we think are certainly ten of the world's best online casinos.

We took the bonuses paid by the casinos, the software offered, the casino's reputation and the casino's payback percentages into consideration in coming up with this list.

We admit to some subjectivity, in that we picked casinos where we have played and have had good experiences.

Please note that we are not affiliated with any of these casinos. Most web sites that recommend online casinos are affiliates of the casinos and are paid a portion of the *money lost* by players. While our recommendations are somewhat subjective, they are in no way influenced by any compensation received from the casinos we recommend. We certainly would not recommend a casino where we are paid a percentage of your losses. Besides, if you use our system, you won't have very many losses. In fact, you will be a net winner playing online.
